

# UN-A200P

# UNIQUE

## Automatic elastic feeding and Joining machine

- Faster
- Logo location
- Collecting function
- Hot press
- The shortest circumference can be 15 cm
- Size code function
- Automatic knotting, automatic length counting

## ■ Features

### Quality is stable and efficiency is improved

Stable sewing size, can improve the industrial efficiency. Minimize the waste of raw materials, from beginning to end can keep stable high quality, high output.

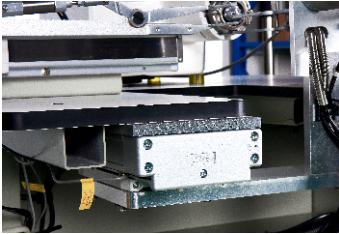

### High efficiency & 1 machine = 5 workers

Automatic test t. cut off, following system, super high production efficiency, reduce the operation for professional skills. It reduces the manpower needed for the rubber band connection process, and a single unskilled operator can operate 4-6 machines independently.

## ■ Detail

### Imported SMC electrical accessories, faster operation

This machine adopts imported SMC servo motor and cylinder combination, the movement mode is faster and more reasonable, at the same time, durability is much higher than the same type of products.

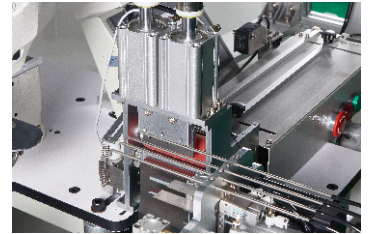

### Advanced equipment, material aligned

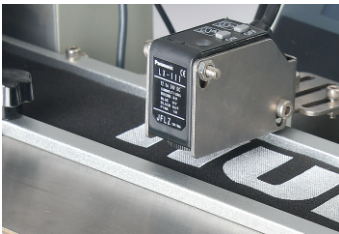

Adopt front block and back push cylinder to ensure that each product is neat and beautiful.

### Distinguish the size code function

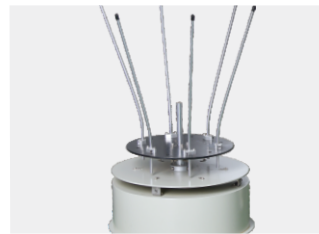

### Automatic knotting, automatic length counting, the error is less than 2 mm

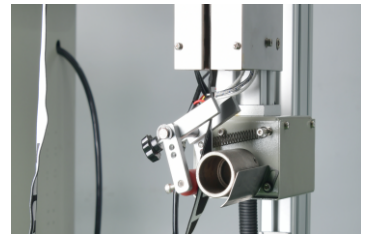

### Logo location

### Large touch color screen, easy operation

### Collecting function

### Hot press and feeding material device
