

# UN-U60S-Q

Ultrasonic edge pattern seaming machine

# UNIQUE

## ■ Features

- New type intellectual ultrasonic generator with 20KHz transducer.
- 3 grades of adjustable ultrasonic power to suit different materials
- With auto frequency chasing system and soft-start technology
- Rollers with various pattern designs are available.
- Easier operation and faster speed than regular sewing machine.
- Capable of seaming, edge trimming, holing, and embossing.
- Suitable for making disposable mask, disposable medical gown, tent, raincoat and other non-woven fabrics or PU PVC products.

## ■ Technical Specification

Model	UN-U60S-Q
Roller size	Width of 60mm, diameter of 50-60mm
Input power	1500W-2500W 3 grades adjustable
Output frequency	20KHZ
Working speed	0-20m per min
Working temprature	≤25 °C
Packing dimensions	1200mm*600mm*1200mm = 0.864 CBM
G/N Weight	100 / 90 Kgs
